

HAD INCOME OF \$82,000; PAID TAX ON \$1,500 YEAR

Examiner McIlwaine Institutes Suit
Against Executor of John
Twohy.

G. J. TWOHY ASKS INJUNCTION

Seeks to Restrain Examiner of Records McIlwaine, Auditor Moore and Norfolk Tax Officials From Collecting Taxes Assessed by Examiner.

Although John Twohy, of Norfolk, died in 1914, possessed of nearly \$500,000 in money, stocks and bonds and much valuable real estate and personal property, it was not until 1910 that he returned for taxation as much as \$1,000 in intangibles. Prior to that year, \$7,250 was his maximum return of this class of property. From 1885 to 1934 he returned for taxation annually, intangibles valued at \$230. From 1900 to 1905 he reported no intangible property at all for taxation.

Examiner of Records Richard McIlwaine, of Norfolk, instituted an injunction in the City Circuit Court of the City of Norfolk, asking that a restraining order be issued preventing Examiner McIlwaine, State Auditor Moore and the Norfolk tax officials from collecting the taxes assessed by the examiner. On the motion of Auditor Moore, the action was removed to the City Circuit Court of Richmond, where the cause is now pending.

GARNETT FILES ANSWER

ASKING FOR AN ACCOUNTING

Yesterday Assistant Attorney-General Garnett filed in the City Circuit Court an answer to the bill brought by George J. Twohy, praying that the answer be taken as a cross-bill, and asking the court to enter an order requiring Twohy to disclose the assets of the estate for the years 1885-1910, inclusive, in order that a correct and proper assessment be made for those years.

Mr. Garnett's answer sets up that John Twohy, in 1912, turned over to George J. Twohy \$300,000 in the securities. After his death in 1914, the settlement of the executor's account for that year showed an annual income of the estate of \$32,000. About \$240,000 in cash was found in bank, and \$85,000 was found in securities not taxable in Virginia. The income from which, however, was subject to tax.

WILL ERECT BUILDING

Odd Fellows of Highland Springs Plan Two-Story Concrete Block Building.

Members of Lodge No. 78, Independent Order of Odd Fellows, situated at Highland Springs, are planning to erect a building which will cost in the neighborhood of \$5,000 if present plans of the members of the lodge materialize. The building will be made of concrete blocks and will consist of two stories. The second floor will be taken up by the meeting hall, which will be furnished by fifty-five feet. The lower floor will consist of the club-room, store, and shower baths.

The lodge has not moved the site of its proposed new home yet, but there are at present three very desirable sites under consideration. It is certain that the building will be erected on Nine Mile Road in the vicinity of Step 10, Seven Pines, Lin.

PARALYSIS PATIENT REPORTED NOT SO WELL

Mrs. Belle Montgomery, Suffering With Disease, Is Now in Strict Quarantine.

The condition of little Mrs. Belle Montgomery, daughter of Mrs. Ira Montgomery, both of whom are now isolated in the contagious pavilion at the City Home, the former suffering from infantile paralysis, was last night reported as favorable. Dr. E. C. Love, Chief Health Officer, however, did not consider her condition so alarming.

So far there have been no further cases in Richmond, though several patients displaying suspicious symptoms, have been reported to the Health Department. Investigation in each instance showed that the disease was not infantile paralysis.

Although the child and her mother have been removed from 312 North Third street, where they were stopping, the house is still under a strict quarantine, and will continue so.

Dog-Catcher's Life Is No Sinecure

So Says W. T. Boswell, Arrested for Seizing Mrs. Koch's Pup At Second Market.

That the life of a dog-catcher is no sinecure, W. T. Boswell, whose name graces the city's pay roll for his services in rounding up the community's homeless mutts, will readily attest.

Boswell was quietly pursuing his vocation yesterday when his eyes caught upon a lanky hound dog whose neck was minus a collar, and it followed that he was lacking a license to roam the city's streets.

The chase was short and swift, with Boswell an easy winner. Fido's yelp protested against a journey toward the dog's heaven when he was ensnared, not far from Sixth and Marshall Streets.

A curious crowd of spectators was split in twain when an angry woman burst through and claimed the yelling prisoner. Unlike the police, who are vested with the power of parole, Boswell said that he could not hold his job and release the pup. An altercation followed, and the parting was as abrupt as the meeting.

While Boswell, who held on to the dog, was willing to let the matter drop, not so with the animal's mistress. She sought out Magistrate J. A. Purdie.

She described herself as Mrs. M. T. Koch, of Chesterfield County. She declared that she had been visiting the Second Market for years, and that she was always accompanied by Fido. The result of her conversation with the magistrate was that she took out a warrant charging Boswell with being disorderly and assaulting her.

The warrant was later executed upon the dog-catcher by Patrolman Stockman, who will tell Police Justice Crutchfield what happened when he appears in Police Court to-morrow morning.

The dog was landed in the pound.

In order that there may be no possibility of further infection.

Dr. Levy last night said that there was no question whatsoever but that the Montgomery child contracted the malady in Philadelphia. With her mother she arrived in Richmond on Monday night. On Tuesday the girl became ill, and on Thursday her affliction was pronounced to be a decided case of poliomyelitis.

At the period of incubation, in the majority of cases, is but four days. Dr. Levy pointed out, there was no doubt but that the child contracted the disease in Philadelphia.

Dr. Levy has requested the co-operation of the Street-Cleaning Department as well as householders in keeping all premises in the vicinity of the Thirty-second Street house spotlessly clean.

TRAFFIC VIOLATIONS

B. W. Jacques and Forest White Are Fined for Speeding—Noise in Hospital Zone.

Several motorists were fined yesterday by Police Justice Crutchfield for violations of the traffic ordinance and exceeding the speed limit.

B. W. Jacques was fined \$25 and costs for speeding an automobile. Forest White paid the same amount for a similar offense.

E. W. Crumpton was fined \$5 and costs for permitting his car to make unnecessary noise while in a hospital zone.

H. B. Stencil paid \$10 and costs for recklessly driving a machine.

Linwood H. Kern, a National Guard chauffeur, was fined \$2 for violating the traffic law at Ninth and Main Streets.

Fire Does \$75 Damage.

Fire in a building at 111 Mayo Street, occupied by a branch of the Cottrell Saddle Company, did damage placed at \$75 last night shortly before 3 o'clock.

GEORGE ROGERS RESIGNS CIVIC ASSOCIATION JOB

Gives Up Position of Executive Secretary of Body Seeking Revision of Charter.

ANDERSON MAY SUCCEED HIM

Board Has Taken No Action Looking to Choice of Successor, Says President John C. Easley—Rogers to Retire on August 31.

Councilman George W. Rogers, executive secretary of the Civic Association of Richmond, has resigned his office in this body, the retirement to become effective August 31. The board of directors of the association has accepted the resignation, and will some time before the end of next month meet to elect a successor.

Mr. Rogers' retirement came without warning, and was received with surprise even by the officers and directors of the association. The letter of resignation assigned no reason for the act, merely asking that the writer be relieved at the end of next month.

"Mr. Rogers' services were in every way satisfactory, and his resignation took us all by surprise," said President John C. Easley, of the Civic Association, last night. "As far as I know there has been no friction between him and any of the directors. The relations between the directorate and Mr. Rogers have always been cordial, and we were sorry to lose him."

DIRECTORS HAVE NOT YET CHOSEN SUCCESSOR

Mr. Easley said that while a number of men have been suggested for the secretaryship, the directors have not yet even tentatively discussed the filling of the vacancy. A meeting for this purpose will be held late in August. Among those who have been suggested for the vacancy is Dr. D. R. Anderson, of Richmond College, who has taken a prominent part in the work of the association.

Mr. Rogers was elected executive secretary about a year ago, when the association was put on a permanent footing. He was active in the city-wide campaign that was waged by the association during the memorable charter-change movement of last year. He appeared frequently before civic and educational bodies in behalf of the simplified reform government plan espoused by the association.

Alleged Brass Thief.

William Thacker, colored, was arrested yesterday by Policeman Holt on a warrant charging him with entering the store of Frederick Steinbruner, on Virginia Street, and stealing a quantity of brass.

The world progresses. To-day ailments that took weeks to cure can now be ended in a few days. If you have various veins or bunches you can start this to-day to bring them back to normal size, and if you are wise you will do so.

Just get an original bottle of Moore's Emerald Oil for 30 cents at any dispensing pharmacist and apply it night and morning to the enlarged veins. It is very powerful and penetrating, and only a little is required.

After a few days treatment the veins will begin to grow smaller, and by regular use will soon reduce to normal.

Moore's Emerald Oil, besides being one of the most powerful of antiseptics capable of destroying the most pernicious germs and the poisons caused by them, is also a marvelous healing agent.

One application, for instance, stops the itching of eczema, and a few applications causes the eruption to dry up, scale off and completely disappear. It is equally as effective in barbers' itch, salt rheum, redness and inflammatory skin trouble.

You can readily understand that Moore's Emerald Oil must be a powerful penetrating preparation, when it has reduced colic and worms, and is recommended for such distress.

People who want to reduce various veins, wens or goiter, or get rid of eczema, ulcers, boils, abscesses or piles in a few days, should not hesitate to get a 50-cent bottle at once. It is so powerful that a small bottle lasts a long time. You can always get Moore's Emerald Oil at Polk Miller's—Adv.

Not for Widows; Not for Orphans; Not for Anyone Who Cannot Afford to Buy Speculative Interests

It is a known fact that genuine information furnished by chemists of recognized authority is questioned by skeptical people. For this reason, we publish below comparative figures, with such explanations as will make clear our reasons for undertaking, with determination, to complete our tests in search for natural gas and oil in Chesterfield County, Va.

ANALYSIS.

BLOOMFIELD WELL.	CHESTERFIELD GAS.
Carbonic Acid	Carbon Dioxide
Illuminating Hydrocarbons of

Ethane
Oxygen

CHERRY TREE.	CHESTERFIELD GAS.
Nitrogen	Carbon Dioxide
Carbonic Acid	Nitrogen
Hydrogen
Methane
Ethane
Oxygen

You now have been shown the relative figures contained in the analysis of Chesterfield fields gases as compared with the operated wells of handsomely paying commercial values.

If Chesterfield Gas was marsh gas in its entirety, it would contain 100% Methane purely, and would have no commercial value whatsoever.

This point seems to be the one on which question has arisen.

Follow this closely: 75.16 Methane is not 100%. Methane is the chief constituent of ALL NATURAL GASES, and most of them contain from 80 to 90% METHANE.

The lower the percentage of Methane the higher the quality of gas.

Natural gas must contain some of these hydrocarbons: Carbonic Acid, Carbonic Oxide, Carbon Dioxide, Carbonic Oxide, Nitrogen, Hydrogen and Ethane.

Ethane is the second chief constituent of natural gas, and usually runs from 5% to 7%.

Ethane is generally taken as positive proof of an oil basin of the paraffin series.

The analysis of Chesterfield gas shows that only one of the above wells exceed the percentage of Ethane therein.

Regardless of what scientific research has unfolded in the past, with respect to gas and oil in Chesterfield, we have faith in the above figures (figures don't lie), and shplying the best and every know all continue this exploitation, em-n method to succeed.

As previously announced, our office will be opened to-morrow (July 31st).
